PROFILE

Software Engineering graduate from Western Governors University (WGU) with a strong foundation in web development, cybersecurity, and AI technologies. Certified by Google in Cybersecurity and AI Essentials, with additional credentials from IBM, Microsoft, and Amazon Web Services (AWS), earned through a variety of hands-on, industry-recognized projects. Demonstrated experience in securing digital assets, developing innovative AI-based solutions, and building professional, user-friendly, and secure websites for businesses. Passionate about technology, problem-solving, and continuous learning, with a proven ability to adapt and deliver high-impact solutions in fast-paced environments.

WORK EXPERIENCE

Google

2025 - PRESENT

Cyber Security Analyst (Internship)

Threat Hunting and Detection:

- Analyzing security logs, alerts, and threat intelligence feeds to identify potential threats.
- Employing advanced techniques like machine learning and data analytics to proactively detect and respond to cyberattacks.

Incident Response:

- Investigating security incidents, such as data breaches, malware infections, and denial-of-service attacks.
- Containing and mitigating the impact of security incidents.
- Conducting root cause analysis to prevent future occurrences.

Vulnerability Management:

- Identifying and assessing vulnerabilities in Google's systems and applications.
- Working with development teams to remediate vulnerabilities.
- Staying abreast of the latest security threats and vulnerabilities.

Security Engineering and Architecture:

- Contributing to the design and implementation of security controls and architectures.
- Developing and implementing security policies and procedures.
- Ensuring that security is integrated into all aspects of Google's products and services.
